Summary — Full Stack Web Developer with 4.5+ years of experience in building scalable enterprise applications using Angular, Node.js, NestJS, and RESTful APIs. Experienced in AWS serverless and event-driven applications (Lambda, EventBridge, S3, SQS, Step Functions) and infrastructure automation using CloudFormation. Strong background in Micro Frontends, backend services, performance optimization, and automated testing with Jest and Playwright. Adept at working in Agile environments, cloud deployments, and mentoring junior engineers while delivering secure and maintainable solutions.

Skills

Frameworks	: Angular (v12+), Node.js, NestJS, Express.js, React
Languages	: JavaScript (ES6+), TypeScript
State & Reactive	: NgRx, RxJS, Signals
Backend	: REST APIs, Microservices, Serverless Architectures
Cloud	: AWS (Lambda, EventBridge, SQS, Step Functions, S3)
Databases	: MongoDB
Testing	: Jest, Playwright
Security	: JWT Authentication, Role-Based Access Control (RBAC)
Styling	: Tailwind CSS, Angular Material
Tools	: Git, GitHub, Postman, Jira, VS Code

Experience

EPAM Systems

Dec 2024 – Present

Software Engineer — Full Stack (Angular + Node.js/NestJS)

- Designed and developed scalable full-stack features using Angular (v17+), Node.js, NestJS, and Express.js for an internal platform in Global Asset Management Firm.
- Architected reusable UI components and Micro Frontends using Angular Elements, enabling independent deployments and scalable frontend architecture.
- Built secure, high-performance RESTful and microservice-based APIs with NestJS, implementing JWT authentication, RBAC, validation, and centralized error handling.
- Implemented automated testing across the stack using Jest and Playwright, ensuring production-ready releases and reduced regressions.
- Improved application performance through lazy loading, optimized change detection, and NgRx-based state management.
- Contributed across the full SDLC within Agile/Scrum teams, collaborating with cross-functional stakeholders and resolving production issues to improve system reliability.
- Mentored junior developers and contributed to internal documentation, coding standards, and knowledge-sharing initiatives.

Nagarro

Jun 2024 – Dec 2024

Engineer — Full Stack Developer

- Worked on internal training projects to design and develop full-stack applications using Angular and Node.js, focusing on modular UI components and REST API integration.

Infosys Limited

Nov 2021 – Jun 2024

Senior Systems Engineer — Full Stack Developer

- Delivered end-to-end enterprise web applications using the MEAN stack, improving scalability, usability, and maintainability.
- Designed and integrated RESTful APIs, implemented responsive Angular UI components, and ensured cross-browser compatibility.
- Followed Agile development practices, participating in sprint planning, daily stand-ups, code reviews, and retrospectives.
- Performed unit testing, debugging, and performance tuning to reduce production defects and improve application stability.
- Mentored junior engineers and supported onboarding through documentation and technical guidance.

Education

Pragati Engineering College

Bachelor of Technology in Mechanical Engineering

2018 – 2021

Awards

- Client Star Performer Award – EPAM Systems (Q3 2025)
- Value Champion Award – EPAM Systems (2025)
- Rise Award for excellence – Infosys
- Insta Award for excellence – Infosys
- Automation Open Challenge Award for Best Tool Development – Infosys

Projects

Confidential – Global Asset Management Platform

Dec 2024 – Present

Tech Stack: Angular, Node.js, NestJS, AWS

- Contributed to the development of a confidential financial rollover platform used by enterprise users within a global wealth and asset management domain.
- Designed and implemented Micro Frontends using Angular Elements, enabling modular feature ownership, independent releases, and scalable frontend architecture.
- Contributed to the development of a two Angular-based Micro Frontends integrated into a larger host application, ensuring seamless interoperability and consistent user experience.
- Implemented inter-microfrontend communication mechanisms to manage shared state, navigation, and cross-feature interactions effectively.
- Built event-driven workflows using AWS services (EventBridge, Lambda, SQS) to support asynchronous business processes, improving system decoupling and system responsiveness.
- Delivered business-critical features that enhanced customer workflows and improved operational efficiency across financial processes.
- Ensured application reliability and release stability through automated testing using Jest and Playwright, reducing regression defects.

Infosys Employee Experience Platform

Feb 2022 – June 2024

Tech Stack: Angular, Tailwind CSS, Oracle Rest APIs

- Developed responsive chatbot and web interfaces using Angular and Tailwind CSS, delivering a consistent user experience across devices.
- Integrated secure REST APIs to enable seamless communication between AI chatbots and external systems.
- Built AI-powered use cases including a Technical Recruiter assistant and a Project Lifecycle assistant to improve operational efficiency.
- Managed key platform modules such as Domain, Account, LLM, and Prompt Management, ensuring scalability and system stability.
- Collaborated with stakeholders to gather requirements, demonstrate progress, and plan iterative enhancements.

Oracle AI First

May 2023 – June 2024

Tech Stack: Angular, Python, Node JS, Tailwind CSS

- Developed responsive chatbot and web interfaces using Angular and Tailwind CSS, delivering a consistent user experience across devices.
- Integrated secure REST APIs to enable seamless communication between AI chatbots and external systems.
- Built AI-powered use cases including a Technical Recruiter assistant and a Project Lifecycle assistant to improve operational efficiency.
- Managed key platform modules such as Domain, Account, LLM, and Prompt Management, ensuring scalability and system stability.
- Collaborated with stakeholders to gather requirements, demonstrate progress, and plan iterative enhancements.

ISEP Market Place

June 2023 – June 2024

Tech Stack: Angular, Node JS, Express JS, Mongo DB, Tailwind CSS

- Built a centralized onboarding platform enabling application discovery, user registration, access management, and feedback collection.
- Developed responsive Angular interfaces and integrated secure REST APIs for seamless communication with external systems.
- Implemented authentication and authorization mechanisms to ensure secure user access and account management.
- Designed a feedback workflow to capture user insights and drive continuous onboarding improvements.

Studio(LCNC Application)

Feb 2022 – June 2023

Tech Stack: Angular, Node JS, Express JS, Mongo DB, Tailwind CSS

- Designed and developed a low-code/no-code platform enabling users to build dashboard-driven web applications with minimal coding.
- Engineered a reusable UI component library to improve development speed and consistency across applications.
- Integrated real-time backend services to support dynamic data updates and interactive dashboards.
- Delivered intuitive, user-friendly interfaces supporting both technical and non-technical users, with built-in collaboration and feedback features.
